Sir:

Pursuant to 37 C.F.R. §1.97, the art identified on the attached form PTO/S/08A and other matters discussed below may be helpful to the Patent Office in its examination of the application identified above.

A copy of each of the patent documents identified on Form PTO/SB/08A is enclosed herewith for the Examiner's consideration.

Concise English Language Explanation Of Non-English Language Documents

DE 197 34 235 A1 discloses a fused switch unit with a fuse link which can be switched to and fro between a switched-on position and a switched-off position by means of a fuse holder for a fuse link. There is further a locking element (4) which is movable in a direction vertical to the feeding direction of the fuse holder, wherein the locking element engages a groove if a switch is switched on and the fuse holder is completely moved into the fused switch unit.

DE 34 06 815 C2 discloses a fused switch unit having a switching jig which is provided to receive a fuse link and which is pivotable between a switched-off position and a switched-on position.

The Patent and Trademark Office Examiner is requested to review the art and determine the extent of the materiality of the disclosures thereof with respect to the patentability of the subject invention. It is expected that the Patent and Trademark Office Examiner will independently conduct a complete search for relevant prior art.

No inference should be drawn and no representation is made or intended: (a) that a search has been made, or if made, was complete; (b) that the art on the attached list presents a comprehensive investigation of the prior art; or (c) that no more pertinent art than that listed is in existence. [See 37 C.F.R. §1.97(g)]

Citation of any art herein is not to be construed as an admission: (a) that the art disclosure is, or is considered to be, necessarily within the invention field of endeavor, pertinent to the instant invention, or equivalent to the instant invention; (b) that the art disclosure is, or is considered to be, necessarily prior in time to a particular date which may be relevant in the instant patent application; (c) that the art disclosure is, or is considered to be, material to patentability as defined in 37 C.F.R. §1.56(b); and/or (d) that the art disclosure is otherwise necessarily prior art with respect to the instant invention and application. [See 37 C.F.R. §1.97(g).]

No inference should be drawn that the discussion of any art herein is a discussion of each and every feature disclosed therein.

Serial No. 10/031,941 - - - 3

Also, there is reserved the right to later set forth how the instant invention is distinguished over the disclosures of any document or other art, including the disclosures of the art cited herein, that may be cited by the Examiner in rejecting a claim in the instant patent application.

Respectfully submitted,

WOOD, PHILLIPS, KATZ, CLARK & MORTIMER
